1.1. Installation

1.2. Creating an Account

1.3. Playing Music

2. Playlists

2.1. Creating a Playlist

2.2. Editing a Playlist

2.3. Deleting a playlist

1. What is Ponce Player?

Ponce Player is a simple music streaming service that gives access to thousands of songs from artists all around the world.

After creating a user profile, you have access to some basic features:

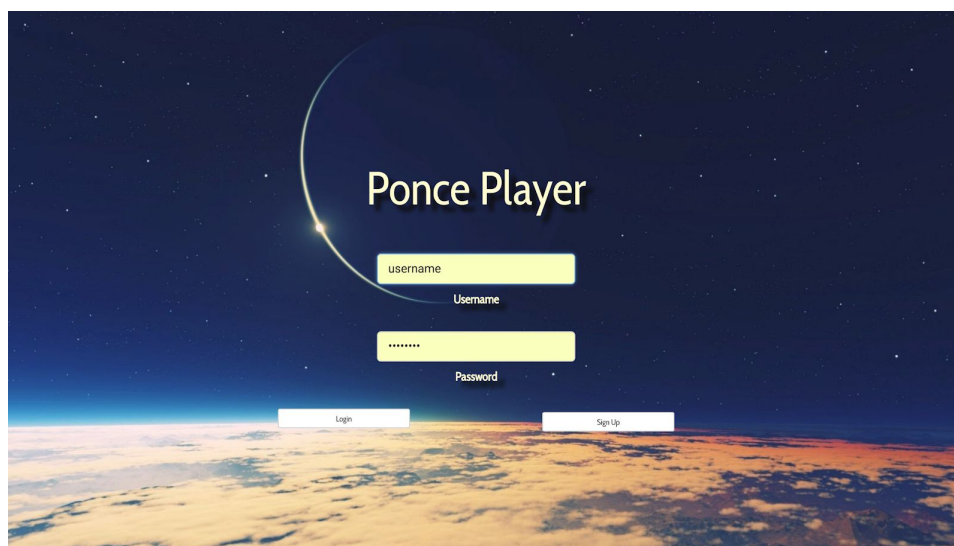

- Choosing what you want to listen to through the search bar
- Build a collection of your favorite songs through creating playlists
- Easy to use user interface with functioning control options

1.1 Installation

To install Ponce Player, [click here](#) and download the project. Once downloaded, make sure that you're running Node.js Version 11.7.0. To install the required packages, go into the root directory and run `npm install`. After all the packages are finished installing, run `npm start` to begin using the app.

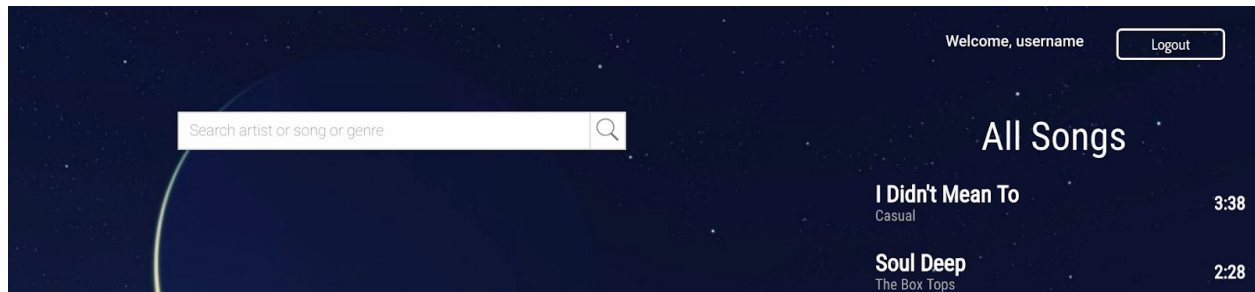

1.2 Creating an Account

Once you start the app, a user account will need to be created in order to have access to the features. As of now, the only requirements are a username and a valid password.

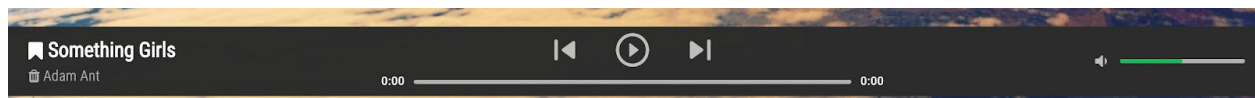

1.3 Playing Music

After you log in, you can use the search bar to search for songs by the song title or by artists, and the matching cases will be shown on the sidebar to the right of the search bar.

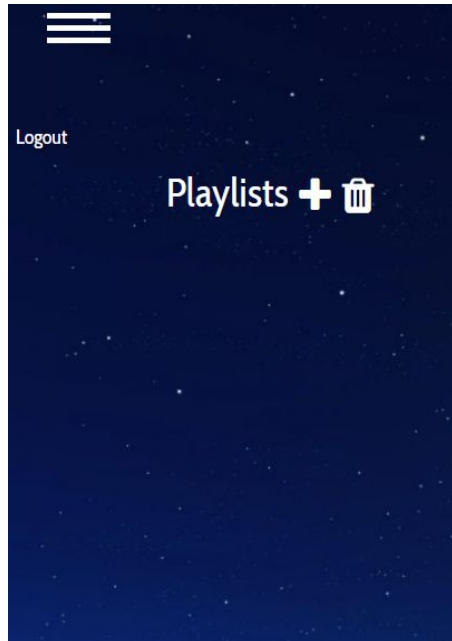

Then you will have to click the song in order to have the song be played. The app will display the song title and artists along with a seek bar and basic video controls.

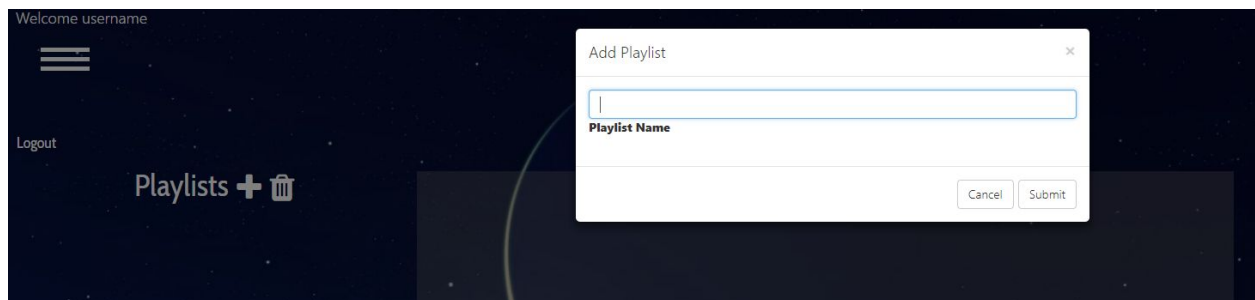

2.1 Creating a Playlist

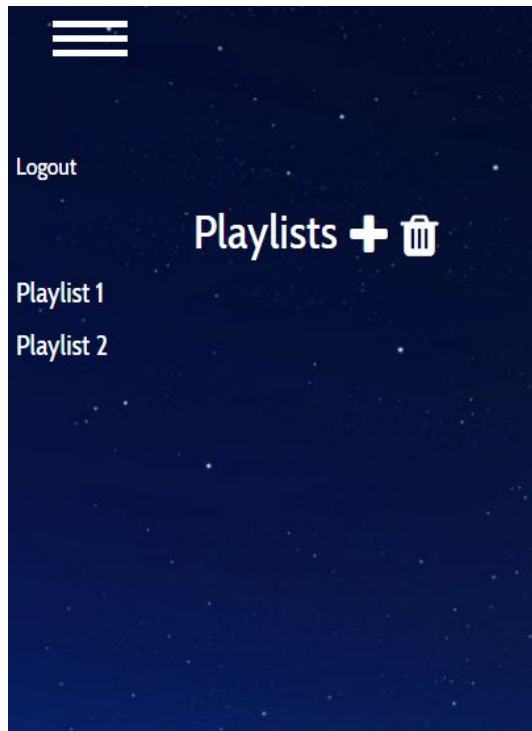

To create a playlist, navigate to the menu icon on the top left corner and press it to open up the side bar that will list the playlists.

Press the + icon to begin bring up a pop up window to enter the playlist name.

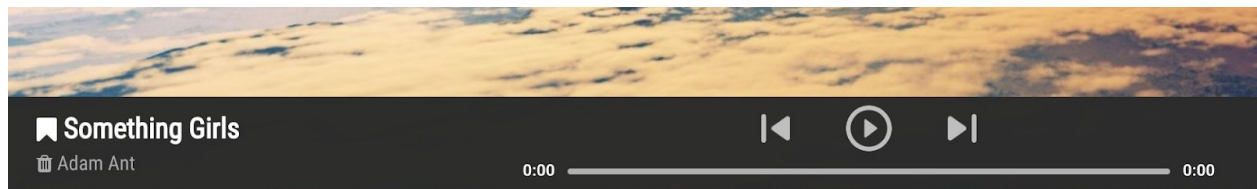

Input the playlist name, and it will be displayed with all the other playlists created on this user account.

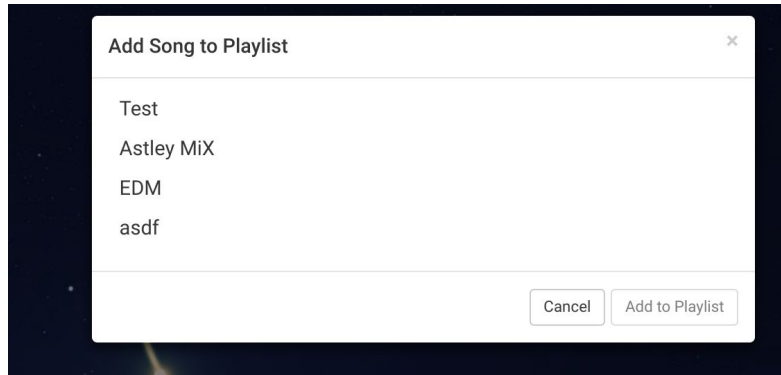

2.2 Editing a Playlist

If you want to add songs to a playlist, you must click a song from the song list and then click the **bookmark** symbol next to the title on the player.

You then select which playlist you would like to add the song to.

To delete a song from the playlist, you select the song and press the **trashcan** icon under the **bookmark** icon.

2.3 Deleting a Playlist

To delete a playlist, press the **Trashcan** icon next to the **+** icon. This will bring up a pop up window listing the playlists that are currently on that user account. Select the playlist you wish to delete and press delete.
